BRIO (75mm)

Brio is a tile panel system built to suit the changing needs of the workspace. Whether it is a private individual workspace or a team communication space, Brio's panel can be moved together to easily transform the working environment.

Brio's panels can be customized and change to adapt to the current work environment and needs. Brio, the new solution for workspace which enables endless configurations to work individually in a private space or in a team, optimizing space.

BRIO, a modular cubicle system.
Brio's tiles is designed to be stacked up to the ceiling level. The cubicle nature of the Brio system enable it to be customized into a managerial or meeting room, or down to a single workstation. Brio lets you create your workspace whether private or in an open space.

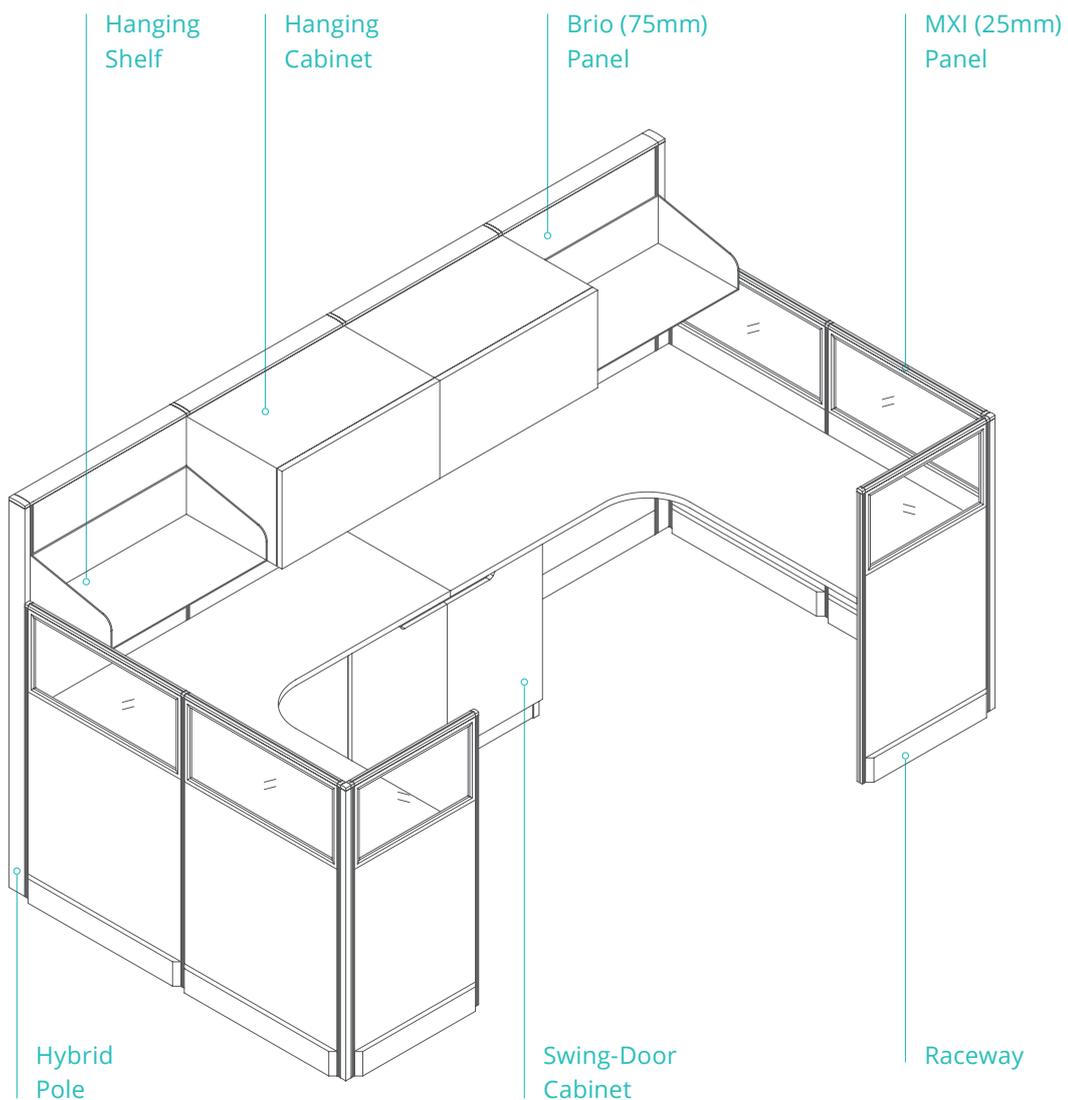

Hybrid Compatibility

Brio (75mm) – MXI (25mm) Hybrid, gets more done in less time in smaller space to create a dynamic workspace.

Brio, 75mm as the main spine.
MXI, 25mm as the divider panel.

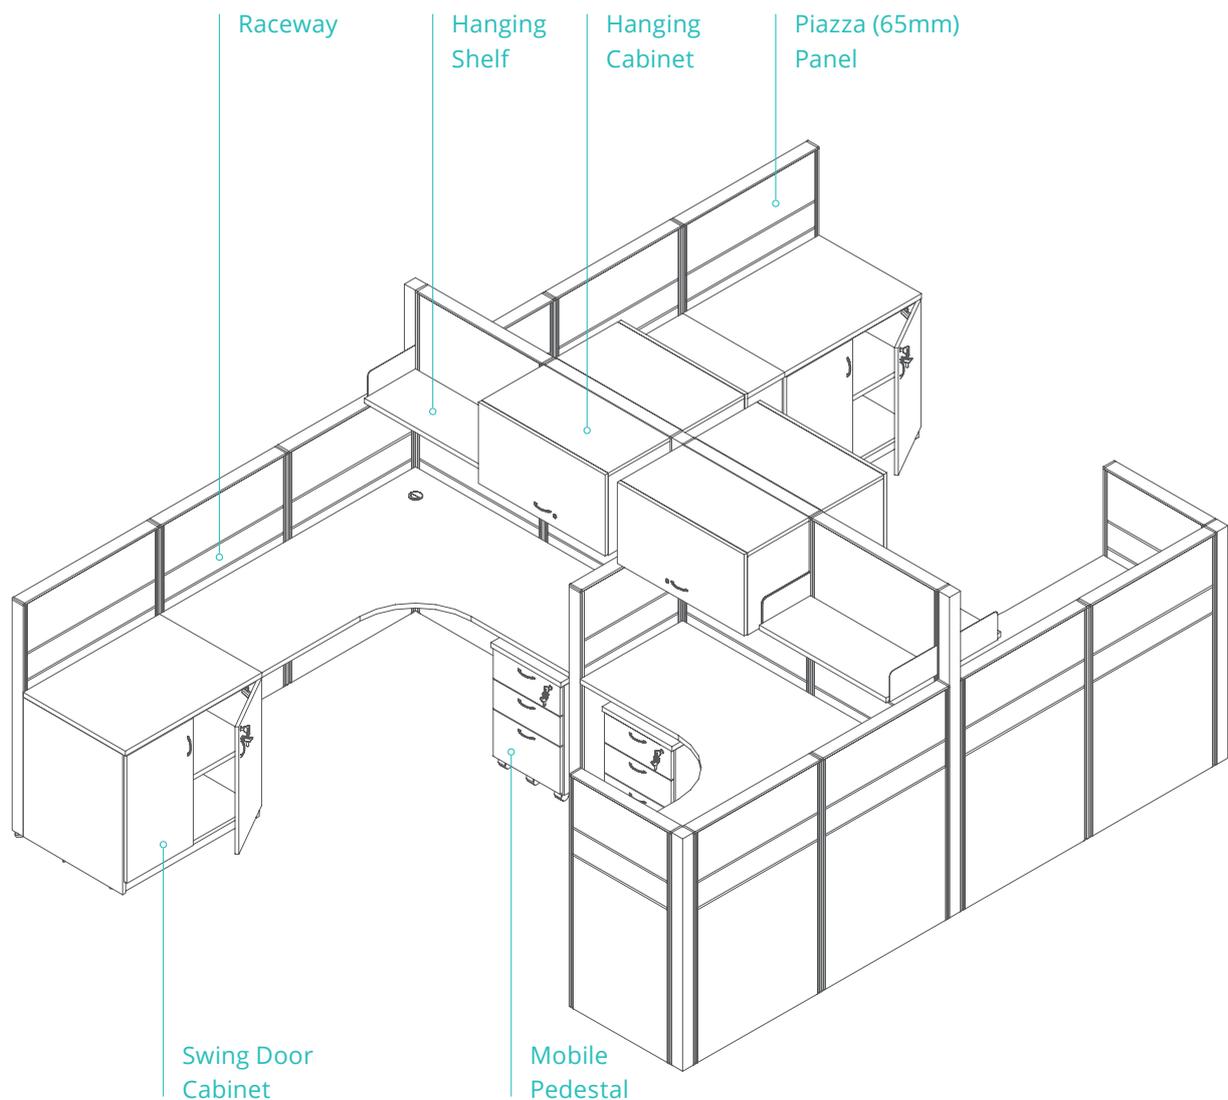

PIAZZA (65mm)

Piazza allows for a delicate balance in between versatility and rigidity of today's workspace. The block nature of the Piazza system can be easily installed. It incorporates a smart clip-system for combining the panels together.

PIAZZA, promotes the sense of shared identity and teamwork. Its simple, functional, flexible concept responds to suit the fast changing conditions in today's workspace. It is easy to install and reconfigured to compelling solution for global work environment for manager workstation, general workstation, and discussion area.

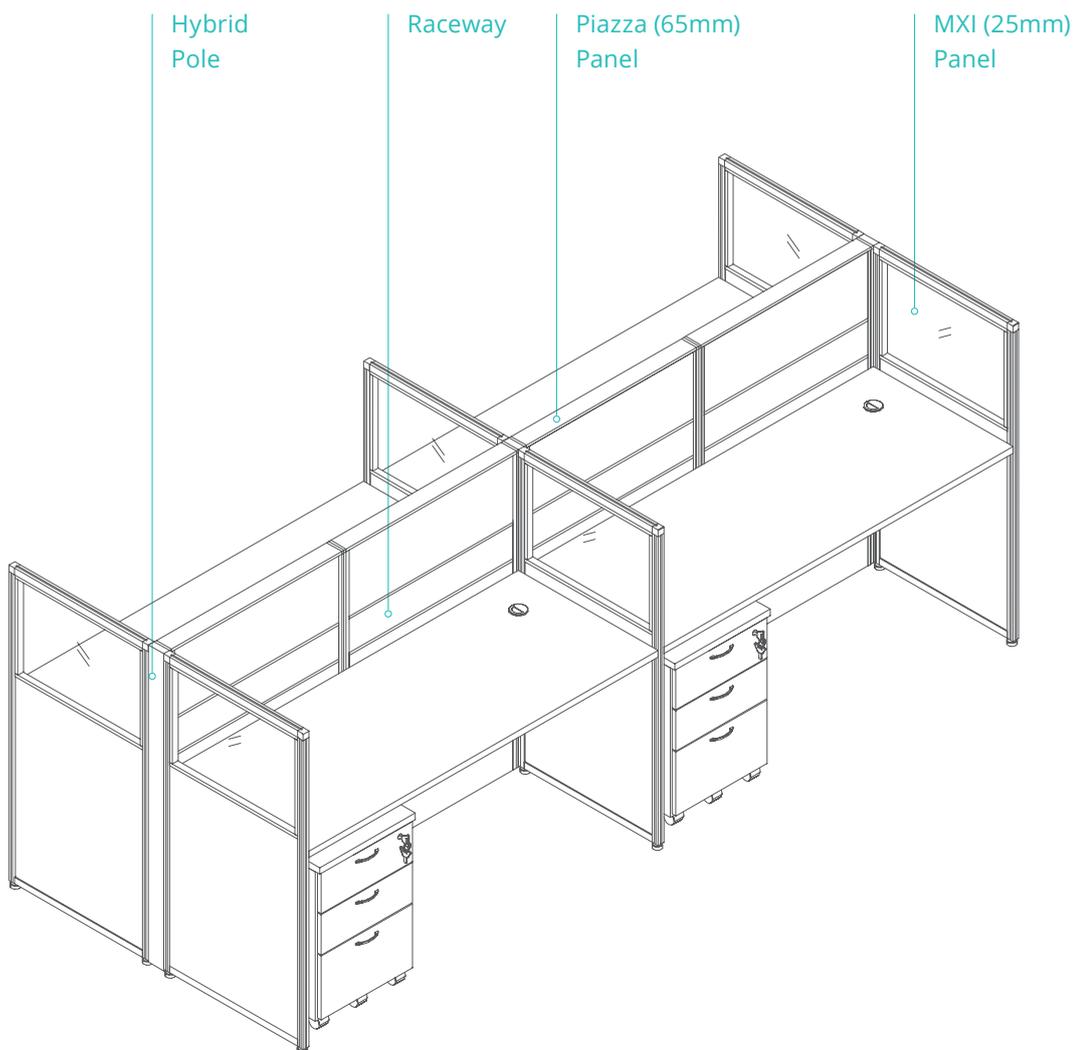

Hybrid Compatibility

Piazza (65mm) – MXI (25mm) Hybrid, maximize privacy while encouraging collaboration and team-working.

Piazza, 65mm as the main spine.
MXI, 25mm as the divider panel.

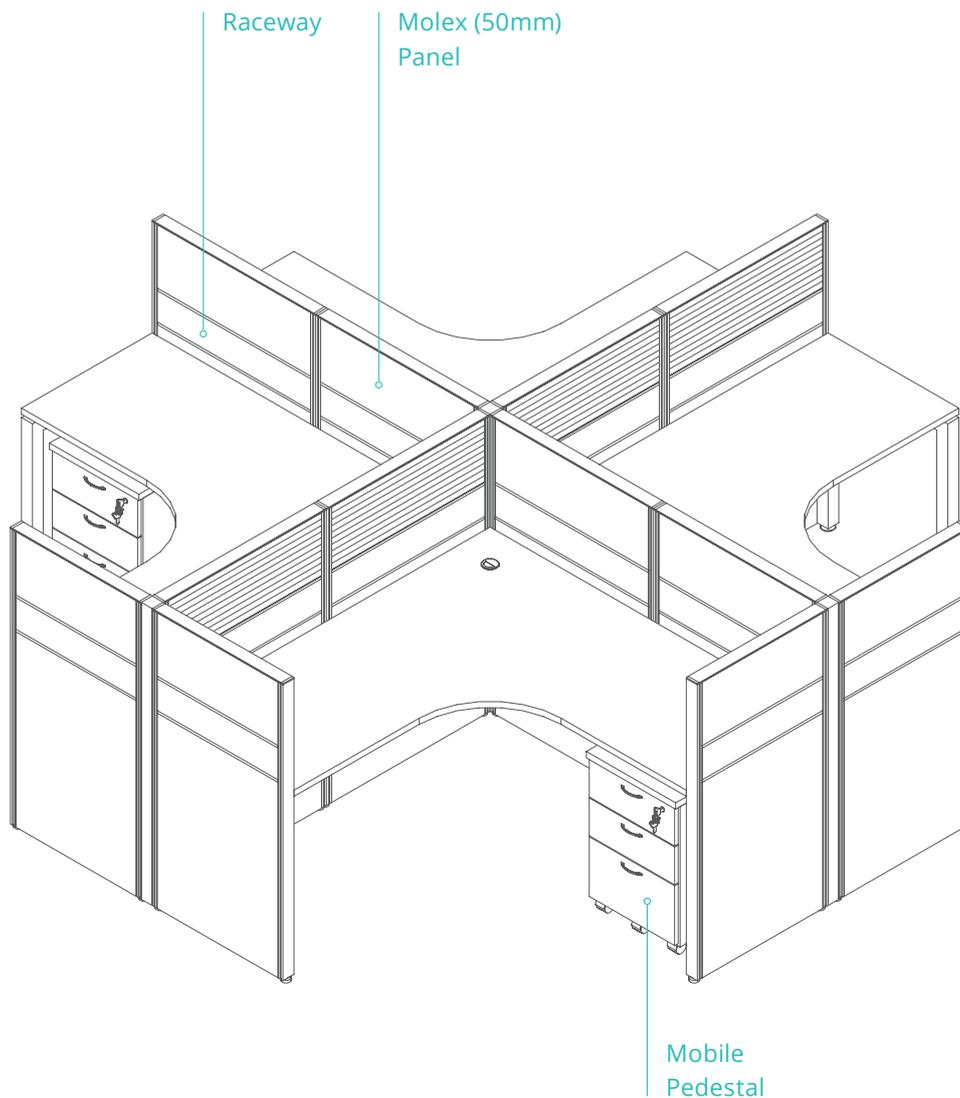

MOLEX (50mm)

Molex's innovative design transforms your office with its sleek yet robust structure. Its lightweight panel structure allows office to be transformed easily to reflect the ever-changing office environment. This features is also supported by the smart-clip system to interlock 2 or more panels together to minimize time needed for installation.

With over 8 skin options to choose from, Molex allows the flexible modular to transform into either private space or highly interactive office needs. Although Molex is just 50mm thick, it also supports a wire management features without compromising its sleek and lightweight looks.

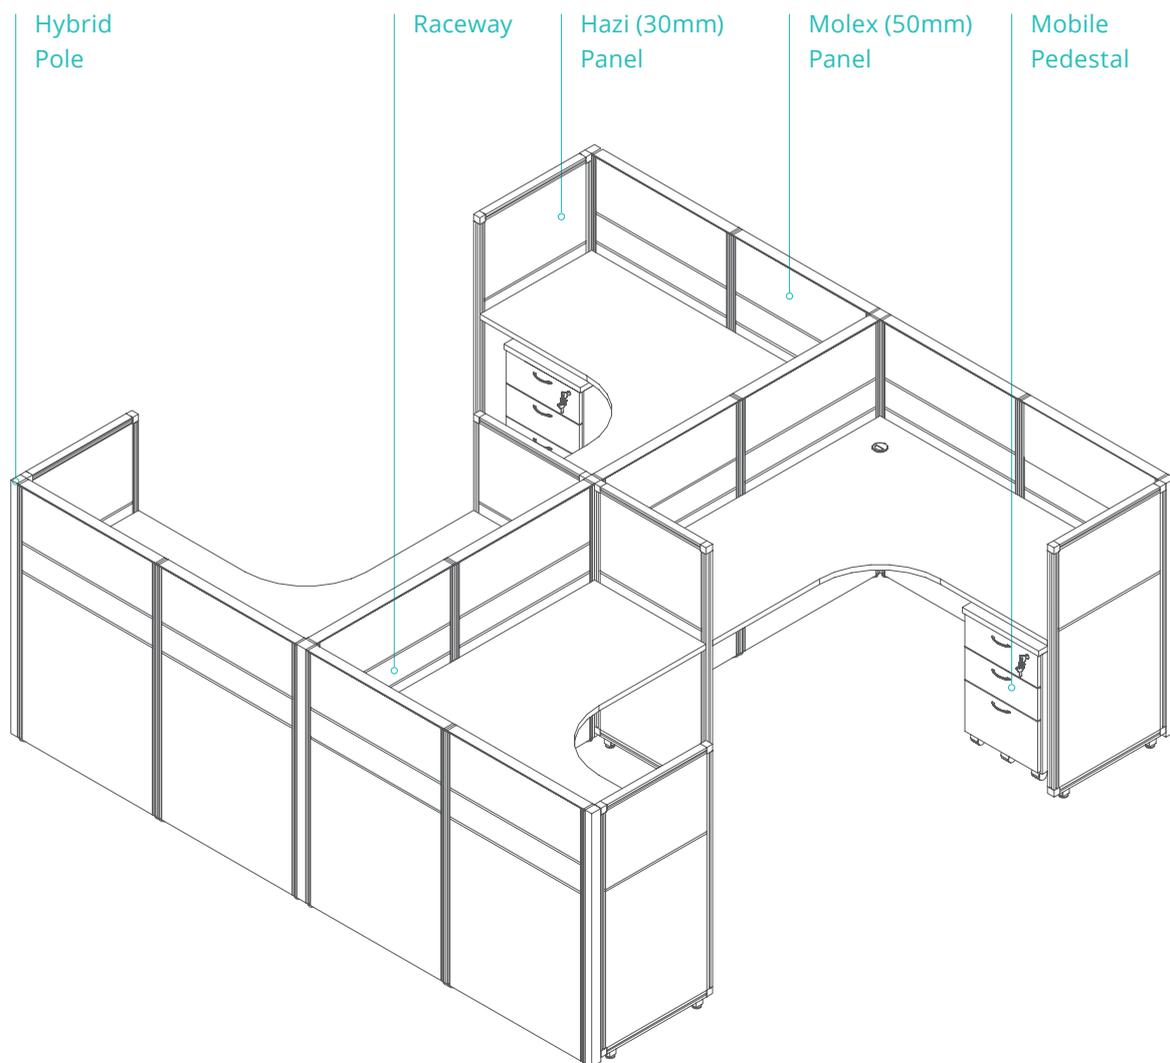

Hybrid Compatibility

Molex (50mm) – Hazi (30mm) Hybrid, brings out the best of both system. Both dynamic systems supported by a wide array of skin options and accessories to adapt to today's challenging office environment.

Molex, 50mm as the main spine.
Hazi, 30mm as the divider panel.

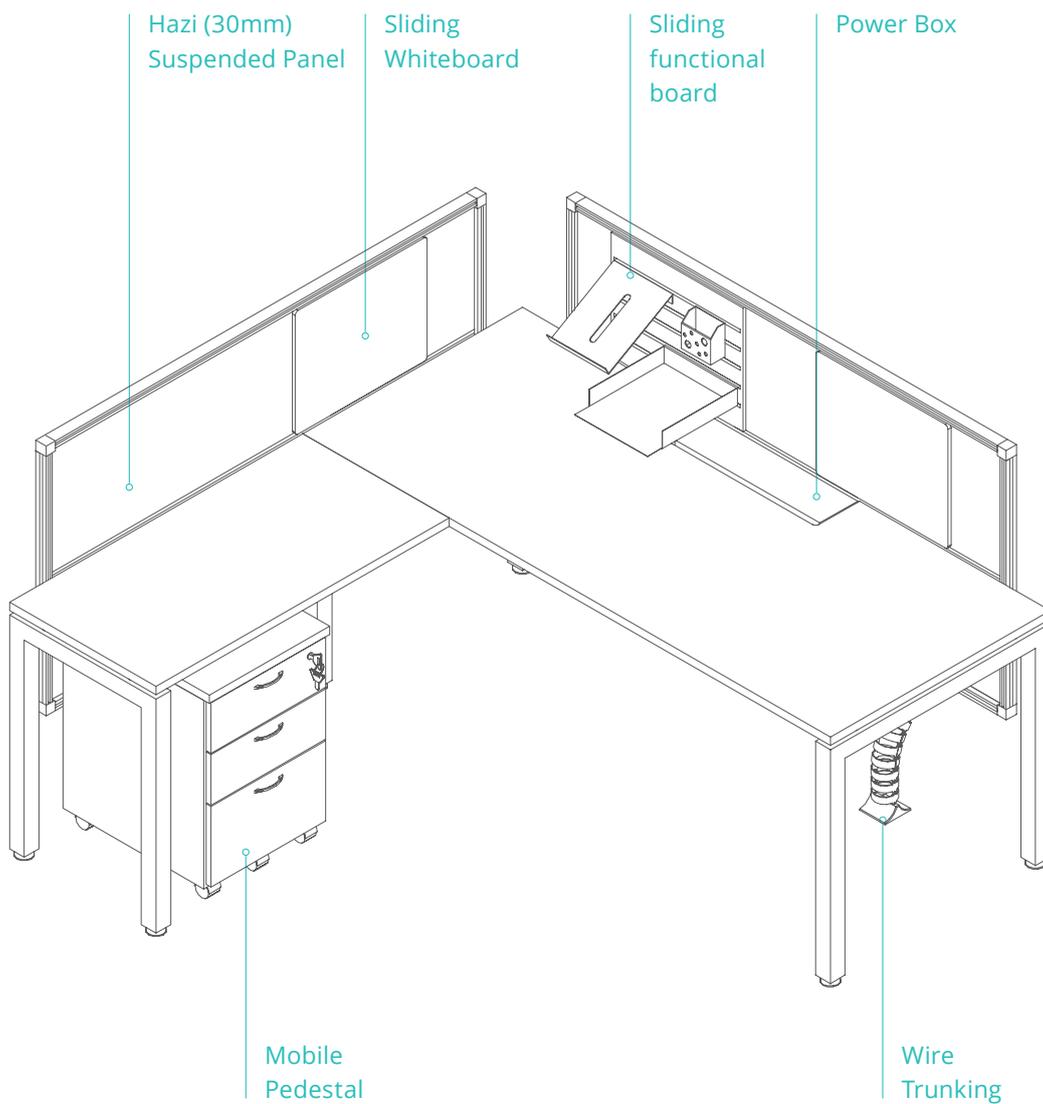

HAZI (30mm)

Agility is the objective when we design and engineer the Hazi screen system. Whether it is used as an on-desk screen or suspended panel, Hazi is designed to enhance the looks of your workspace while maximizing the efficiency of the user.

HAZI's agility means the panel can feature more than one skin at anytime to allow for multiple screen accessories to achieve space efficiency.

Cluster of 4

Concentration within a team maximizes efficiency while enforcing team-working spirit.

Cluster of 6

Easy of connecting between team member while maintaining required privacy.

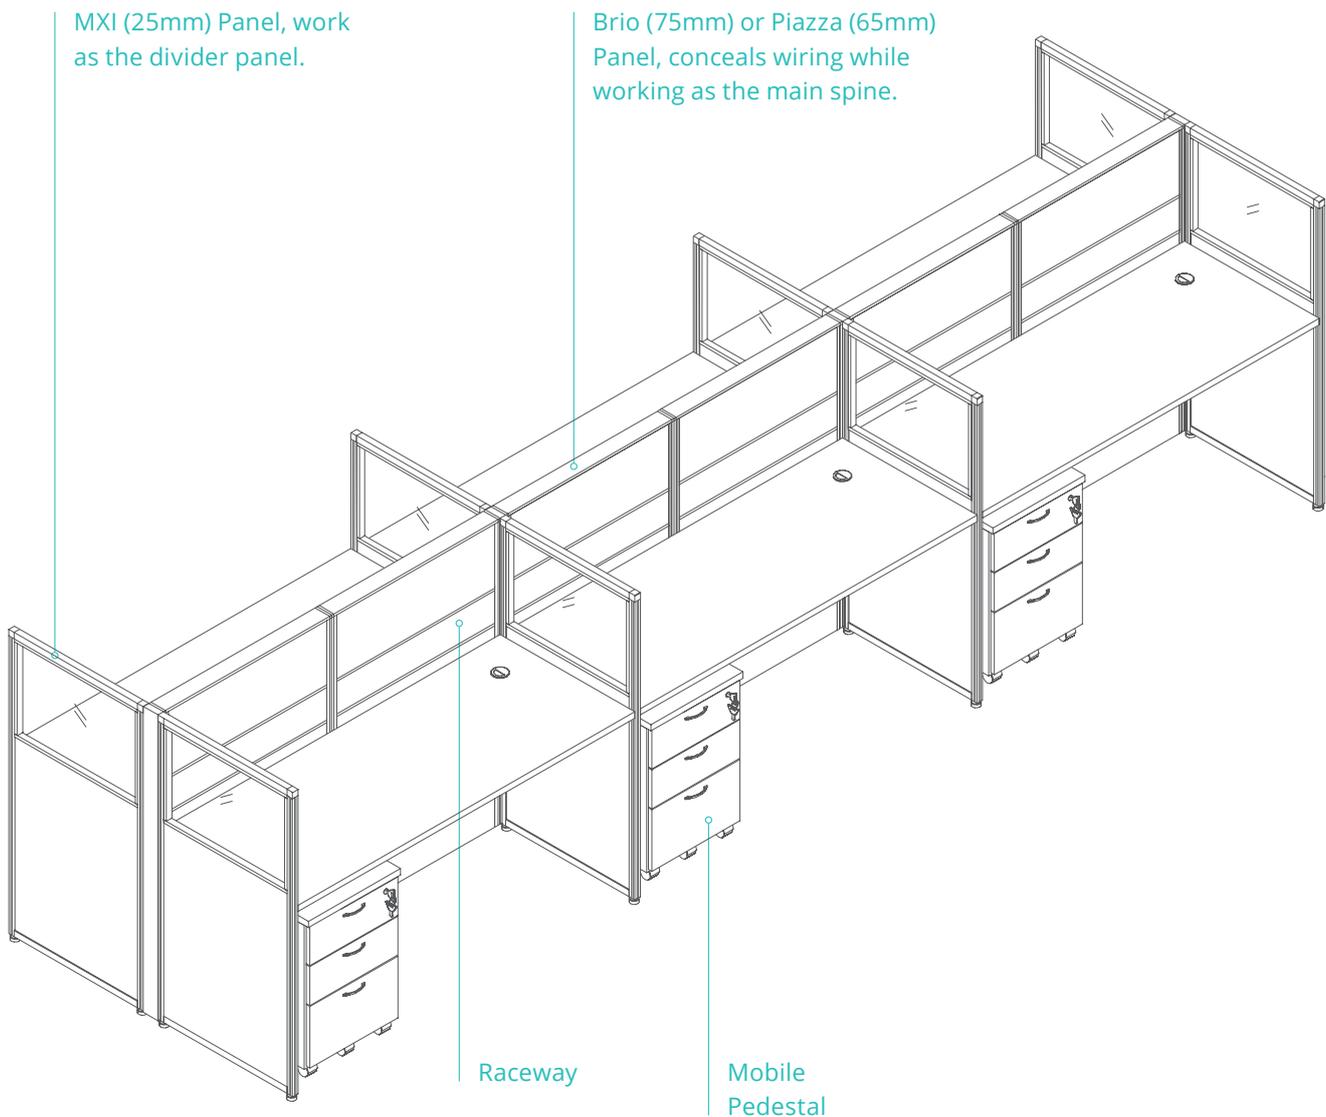

MXI (25mm)

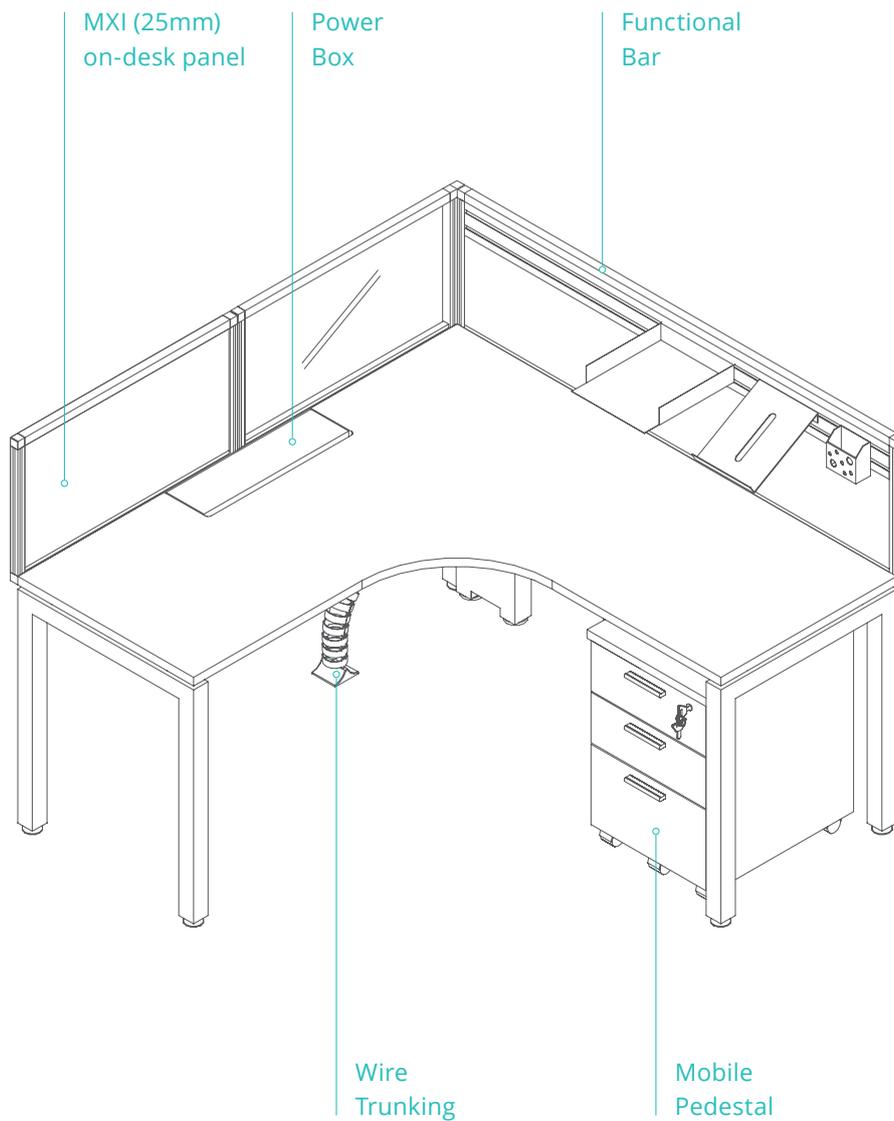

The MXI answers the most challenging issue we face in our workspace today: SPACE. MXI is designed and engineered to optimize every square meter in our workspace.

From individual workstations to aggregate compositions, hybrid between MXI (25mm) with Brio (75mm) or Piazza (65mm) open up new solutions for teamwork and creative collaboration even in a small space, thanks to the versatility of its parts and simple combination systems.

MXI with its on-desk-mounted panels configuration, allows for privacy without locking yourself in a confined space.

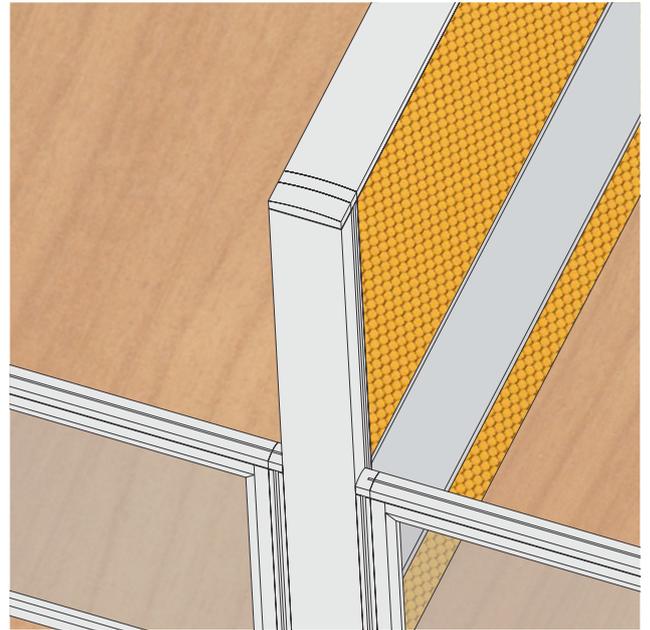

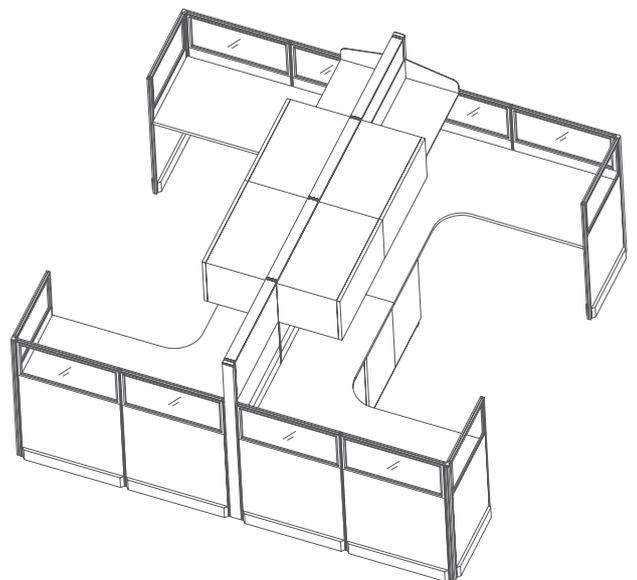

HYBRID SPACE PLANNING SOLUTION
